March 31, 1998

Lester Snow, Executive Director
CALFED Bay-Delta Program
1416 Ninth Street, Suite 115
Sacramento, CA 95814

Dear Lester:

On behalf of the Board of Directors of The Silicon Valley Pollution Prevention Center, I want thank you for your participation at the State of the South Bay Symposium on March 27, 1998 in San Jose. Your keynote address was both informative and entertaining. No one will ever look at laser pointers in quite the same way.

I hope the focus of CALFED at the Symposium will be a catalyst for a broad South Bay involvement with the Programmatic EIR/EIS review process. Several legislators or their representatives present at the Symposium indicated their support for a South Bay public presentation of the CALFED Program during the review period.

Your remarks gave the symposium attendees a great deal of information to digest, and will hopefully assist our local decision makers in providing CALFED with some constructive input during the public review process currently underway.

I am glad we had the opportunity to discuss some of the watershed management issues during lunch. I welcome your personal reaction to the structure of the symposium or suggestions for improving our dialogue with CALFED during the programmatic review period and project development phases.

Thanks again for making the trip to San Jose. We hope you will return in the near future.

Warmest regards.

Patrick Ferraro, Executive Director
